

Enterprise Suite Product Features

iDashboards is the fastest way to turn your data into decisions. We don't just provide richer, more visually engaging ways to display your data. We offer easy-to-build, dynamic dashboards that create context for any user — in any organization — so you can draw real meaning from raw data. No matter who you are, or what industry you work in, we can rapidly reduce the time it takes to build beautiful dashboards and discover powerful insights.

USER FRAMEWORK

- Web-based Flash/Flex user interface (UI)
- Supports all browser types: IE, Firefox, Chrome, etc.
- Secured log-in and role-based permissions
- Ability to display data from multiple data sources
- Point-and-click chart designer framework for rapid dashboard development
- Drag and drop to open and reposition charts, panels, and frame borders
- Visibility Pack: Prebuilt user activity dashboards
- HTML5 capability for mobile viewing

RIGHT-CLICK MENU

- Intuitive and easy
- Access menu anywhere on the dashboard
- Dashboard and chart controls
- Almost zero end-user training
- No programming needed

DRILLDOWN

- Drilldown to charts and other dashboards
- Drilldown to external URLs
- No limit on levels of in-depth drilldowns
- Auto filtering of data within a drilldown
- Pass user and context parameters
- Drilldown to update other frames within the same dashboard
- Drilldown to dashboard parameter

REAL-TIME USER FILTERING

- Charts can include multiple pivots, allowing users to select criteria to filter chart data
- Input parameter controls
- Synchronized pivots
- Dynamic picklists

NOTES & TEXT

- Sticky notes on individual charts
- Embed text within a dashboard

FLASH & HTML

- ViPanel framework for embedding Flash apps in dashboards
- Embed simple Flash files within a dashboard
- Add/edit basic HTML within a dashboard using the built-in GUI or source HTML editor

EXCEL EXPORT-IMPORT

- Export chart data to a spreadsheet
- Import spreadsheet data
- Use spreadsheets as live data sources

PRINT & MAGNIFICATION

- Maximize individual charts
- Magnify function with chart interaction
- Print dashboards and individual charts

USER PERSONALIZATION

- Users can customize their charts and dashboards
- Users may save dashboards to personal category
- Data integrity is not affected
- Create global and personal color palettes and apply to chart axes and range sets
- Change dashboard framework color and language
- Bookmark dashboards
- A favorite dashboard can be displayed upon user log-in
- Recently viewed dashboard list
- Personalize dashboard list style; categories or dashboard names
- Configurable category sort order and dashboard list position (top, left, right)
- User may build your own image charts by layering dynamic points on your custom image

SECURITY FRAMEWORK

- Security and access restrictions
- Role-based permissions and access
- Single sign-on (SSO) with other applications

- LDAP server integration
- Third-party SSL certificate encryption

DATA CONNECTIVITY

- Support for most relational databases using JDBC or ODBC
- Microsoft SQL Server, Oracle, Sybase, MySQL, MS Access, and more
- Database tables, views, and stored procedures
- Custom SQL queries with joins, aggregations, filters, and macros
- Support for Excel spreadsheets
- Write SQL queries against different spreadsheets
- Connectivity for Google Analytics
- Connectivity for Microsoft Analysis Services (OLAP Cubes)
- Connectivity for Facebook
- Connectivity for Twitter
- Connectivity for Salesforce
- Connectivity for Big Data

ENTERPRISE SCALABILITY FEATURES

- Filter-on-user allows for large volumes of users
- Server-side authentication with dynamic user inserts
- Server-cluster deployment for load balancing
- Zero client-side footprint

REAL-TIME DATA UPDATES

- Auto refresh at predetermined time intervals
- Enforces live updates
- Intervals as low as 60 seconds
- Manual refresh

Enterprise Suite Product Features cont.

INTERACTIVE INTELLIGENCE

- iDashboards patented technology
- Rapid insight into relevant data
- Interactive charts based on common data

DYNAMIC MACROS

- Generate dynamic queries specific to logged-in user
- Date Macros generate dynamic queries for different time windows
- Drilldown Macros generate custom drilldown URLs to external applications

SUPPORT FOR MOBILE DEVICES

- iPad App
- Android Tablet App
- HTML5 capability

PORTAL INTEGRATION

- JSR168 compliant
- Microsoft SharePoint
- Integration with custom applications using single sign-on (SSO)

DASHBOARD EXPORT-IMPORT

- Dashboard export-import from development to test to production
- Easy upgrades for OEMs

REAL-TIME ALERTS

- Allows for user-level dashboard, e-mail, and SMS text alerts when certain conditions are met, even when dashboards are not open
- Each alert may be sent to one user or a group of users
- Each alert is tied to a chart for better understanding of alert-related data
- Varying escalation levels may be created by having multiple alerts on a single chart
- Alerts are configured through a point-and-click interface
- Rules (data logic) and scheduling (frequency of alert checks) may be configured by end users
- Alerts are integrated within the iDashboards Flash UI — alert icon appears in the bottom right
- Alerts may be monitored as often as once every 60 seconds
- Alerts help in proactive alerting of data exceptions (management by exception)
- Secure encrypted alert e-mails may be sent using TLS and SSL

EMBED VIDEO

- Embed video files within dashboards
- Create a corporate communication platform combined with BI insight

REAL-TIME ANALYTICS

- Provides the ability to perform dynamic calculations on real-time data
- Results of derived calculations may be displayed as new data columns
- Conditional logic may be applied to real-time data to derive new indicators
- Real-time statistics may be derived from the data feed and outliers may be identified
- Percent contribution of each to the group may be computed
- What-if analysis may be performed by applying user-specified values to derived columns
- Users get advanced analytical results with intuitive visual displays

REPORTS

- Allow you to get a reporting view of the dashboard data
- Drilldown from a dashboard to a report that can be viewed in HTML and PDF
- Perform basic summary statistics (mean, median, count, etc.) within a report
- Report scheduler to automatically e-mail a PDF report to designated recipient(s) using a custom schedule

Optional Licenses

DISPLAY SOLUTION SOFTWARE LICENSE

- Helps create dynamic displays of dashboards on monitors or TVs
- Enhanced controls: pause, advance, and reverse
- Each display of dashboards presents live data retrieved at the time of display
- Optimized for display only and not for user interaction
- Each license restricts dashboard display to one monitor/TV only
- Single iDashboards server can manage several displays — to facilitate dashboard displays on multiple monitors/TVs; multiple licenses are required
- Supported through iDashboards Flash UI — no additional software is required

WEB LICENSE

- Allows for display of dashboards to an unrestricted number of users without log-in credentials
- Dashboards can be published on an Intranet (behind firewall) and on the internet (outside firewall)
- Allows for limited user interaction such as drilldowns, pivots, and printing
- User-level customization and right-click menu are inactivated
- Dashboards may be directly accessed through a URL
- Supported through iDashboards Flash UI — no additional software required
